25X1A

1. Comment. The last report of this type was received in the summer of 1953. As compared with loading statistics for the time between 1 and 10 April 1953 the number of cars loaded for the Soviet occupation forces remained about constant with a daily average of 450 to 500 cars, except for a higher number of cars reported during the first five days in April 1954 in connection with combat firing practices.

25X1A

2. Comment. This type of report was also last received in the summer of 1953. The figures indicate the flow of traffic across the border stations mentioned. The information also permits a check on the outgoing and incoming rolling stock.
